ABOUT ME

Final-year Electronics and Computer Science undergraduate with hands-on experience developing full-stack and AI-powered applications using C#, .NET, React, Spring Boot, Node.js, Python, and FastAPI. Skilled in REST API development, frontend-backend integration, database systems, and cloud deployment workflows. Interested in software engineering, scalable backend systems, and modern AI applications.

EDUCATION

University of Kelaniya

BSc (Hons) in Electronic and Computer Science

July 2023 - Feb 2027

- Current GPA: 3.50 / 4.00

Relevant Coursework: Full-Stack Development, Enterprise Software Architecture, Advanced Database Systems, Web Development, Visual Programming, Object-Oriented Programming, Database, Software Engineering, Machine Learning

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, C, C#
- Frontend Development:** React, HTML, CSS
- Backend & APIs:** Node.js, Express.js, Spring Boot, FastAPI, Flask, RESTful API Development
- Databases:** MySQL, MongoDB, SQL Server, Oracle (PL/SQL), ChromaDB
- Cloud & DevOps:** Docker, AWS EC2, Nginx, PM2, Git, GitHub
- Software Engineering Practices:** Agile development workflows, Git-based collaboration, system integration, CRUD system design, debugging, API design, and basic unit testing

SELECTED PROJECTS

Employee Management System | Desktop Application

July 2025 - Sep 2025

- Tech Stack:** C#, .NET Framework, SQL Server, Windows Forms
- Developed a desktop-based employee management system using C# and .NET, enabling efficient handling of employee records and administrative operations.
- Implemented full CRUD functionalities with relational database integration for seamless data insertion, retrieval, updating, and deletion.
- Designed UI components and integrated backend logic using object-oriented and event-driven programming principles to build a structured business application.

Sri Lankan Wedding Platform | Full-Stack Web Application

Dec 2025 - Feb 2026

- Tech Stack:** Spring Boot, React, Java, JavaScript, REST APIs, MySQL, Docker, Git
- Developed scalable REST APIs and integrated dynamic React frontend components for a full-stack multi-vendor wedding management platform using Spring Boot, Java, JavaScript, and MySQL.
- Engineered advanced vendor listing, review, search, and filtering functionalities to enhance real-time user interaction, vendor discovery, and platform usability.
- Collaborated in a Git-based agile development environment, contributing to frontend-backend integration, debugging, testing, and modular feature development across the application lifecycle.

AI-Powered Real-Time Chat Application | MERN Stack

Nov 2025 - Jan 2026

- Tech Stack:** React, Node.js, Express, MongoDB, LLM APIs, AWS, Nginx, PM2
- Developed a real-time LLM-powered chatbot application using the MERN stack, integrating LLM APIs to enable intelligent, API-driven conversational workflows.
- Built and optimized RESTful backend services using Node.js and Express for chat session management, conversation state handling, and low-latency communication.
- Deployed and managed the full-stack application on AWS using Nginx as a reverse proxy and PM2 for process management, ensuring scalability, reliability, and improved performance.
